

CUT LABOR by **50%** to **100%**

CCCWi writes software designed to give your company the **TECHNICAL ADVANTAGE** over your **COMPETITION**. We do this by enhancing or completely revising the current processes that make up your business.

The result: **The TIME it takes to complete many tasks will be REDUCED by 50% to 100%!**

Additional benefits:

- **Minimize Errors** – *Mistakes that normally occur in manual, complicated, and error prone tasks can be virtually eliminated by reducing the human component of the work and by adding software based checks and balances.*
- **Historical Statistics at Your Fingertips** - *This will allow you to know exactly what is happening in every aspect of your business and to identify problem areas before they become serious.*
- **Track Time to Complete Tasks** - *You and your employees will be able to see how much work they complete and how error free that work is for every day, week, month, quarter and year. The results can be measured against previous time periods. Statistically, people tend to improve the speed and quality of their work when it is being tracked or is measured with others.*
- **Reduce the Number of Steps Required to Complete Customer Requests** - *Multiply the work that your employees can complete by reducing the steps required to handle each customer request. This inspires employee self-confidence, job satisfaction and improves moral.*
- **Fast Learning Curve** – *Implementing processes is quick and easy with few steps to learn. As such, long time and even new employees will become productive in no time.*

CCCWi is licensed, bonded, and always provides references. Our professionals have a minimum of 15 years experience (company wide average of 22 years) in Customer Relationship Management. CCCWi enables businesses to handle more customers with less work while reducing expenses. Most businesses realize benefits within 3 to 4 weeks.
